Summary Insights

Elective surgery activity increased over the long term, although there were clear disruptions around 2020–2022.

Waiting list pressure grew across the period, with stronger increases after 2018 and continued pressure after 2020.

Overdue patients increased sharply during 2020–2022, showing the largest performance disruption in the timeframe.

On-time surgery performance was stronger before 2020, then declined and has not fully returned to earlier levels.
